1 Introduction

The project website www.atgentive.com is created as the part of project AtGentive, WP (working package) 6, deliverable 6.1, following one of the main goals - dissemination the results of the project from a scientific and commercial perspective. This site should be primarily used for the dissemination of the results of this project. It is providing information for the public, such as event calendars, deliverables. Part of the website contains the possibility to try out the demo version of the Living Actor.

2 The description of the web site

This website is presenting the AtGentive project to public, therefore all the information are displayed in a certain density compared to original project description. The purpose of the web pages is establishing an “Internet presence” for disseminating the result presenting papers in conference or journals, writing white paper etc. Over all activity for the website will be monitoring on the project achievements and progress via posting deliverables and researched results.

2.1 Structure of the web site

The structure should cover the basic information demands concerning this project. In a screenshot version please see the following.

```
Home – www.atgentive.com

Introduction --> Workpackage description…

Events --> Calendar of events

Consortium --> Introduction of partners

Demo --> Living Autor demo version

Download

Gallery

Contact --> Contact details of all partners protected by password
```

WP1

WP2

WP3

WP…
2.2 **Description of the main sections**

2.2.1 **Main page**

This page provides very basic information about the project. The main purpose of this page is to introduce the aim and the purpose of the project. All the funding scheme logos are provided.

2.2.2 **What is it?**

Shows the basic structure of the project and includes links on more detailed description of particular working packages, where all the milestones, deliverables and the time planning of the project is included.
2.2.3 …and the Work Packages

Above is example of WP1 – how is it displayed on the web.
2.2.4 News/Events
Here are displayed all significant project events in the past and near future put in the chronological order.

2.2.5 Consortium
This is a summary describing all project members. This page is interactive with the partner’s websites and with the work packages, in which each particular partner has a leading role. Again, the main purpose of this page is to make a brief description of each partner included in the project and then to let anyone who would be interested to find out more about partners on their home websites.
2.2.6 Living Actor Demo

Living Actor Demo page enables to simulate a few of basic Living Actor features. Anyone can download this demo version and see what the possibilities of the Living Actor avatar are. This page is very important for visualisation of the project aim for public.
2.2.7 Download page
Download page serves for future free downloadable files.

2.2.8 Gallery
This page shows photo documentation of meetings and other events concerning this project.

2.2.9 Contact us
This page contains contact to key persons in the project. To avoid potential risk coming from web robots analyzing web pages and searching potential email addresses as target for the future spam – the “real” user have to be human – page is protected by simple tool.
3 Infrastructure

Website is hosted on computer with following parameters:

3.1 Hardware

CPU: 1x 2.6 GHz, Intel Pentium
Memory: 2GB
Hard disk: 160 GB

3.2 Software and technologies

Operating system: Win2003, antivirus software Alwill, .NET 2.0
Programming language: C#, ASP pages, JavaScript, Macromedia Flash.
LivingActor technology.

3.3 Hosting

Connection to the Internet: Connected via Czech academic network CESNET.
